

IMPLEMENTATION OF Q-MART IN SHOPPING

Shopping on the Integrated Digital Marketplace Platform is designed to be easy and enjoyable for everyone. Users can explore a wide variety of products across different categories, like electronics, clothing, and home goods.

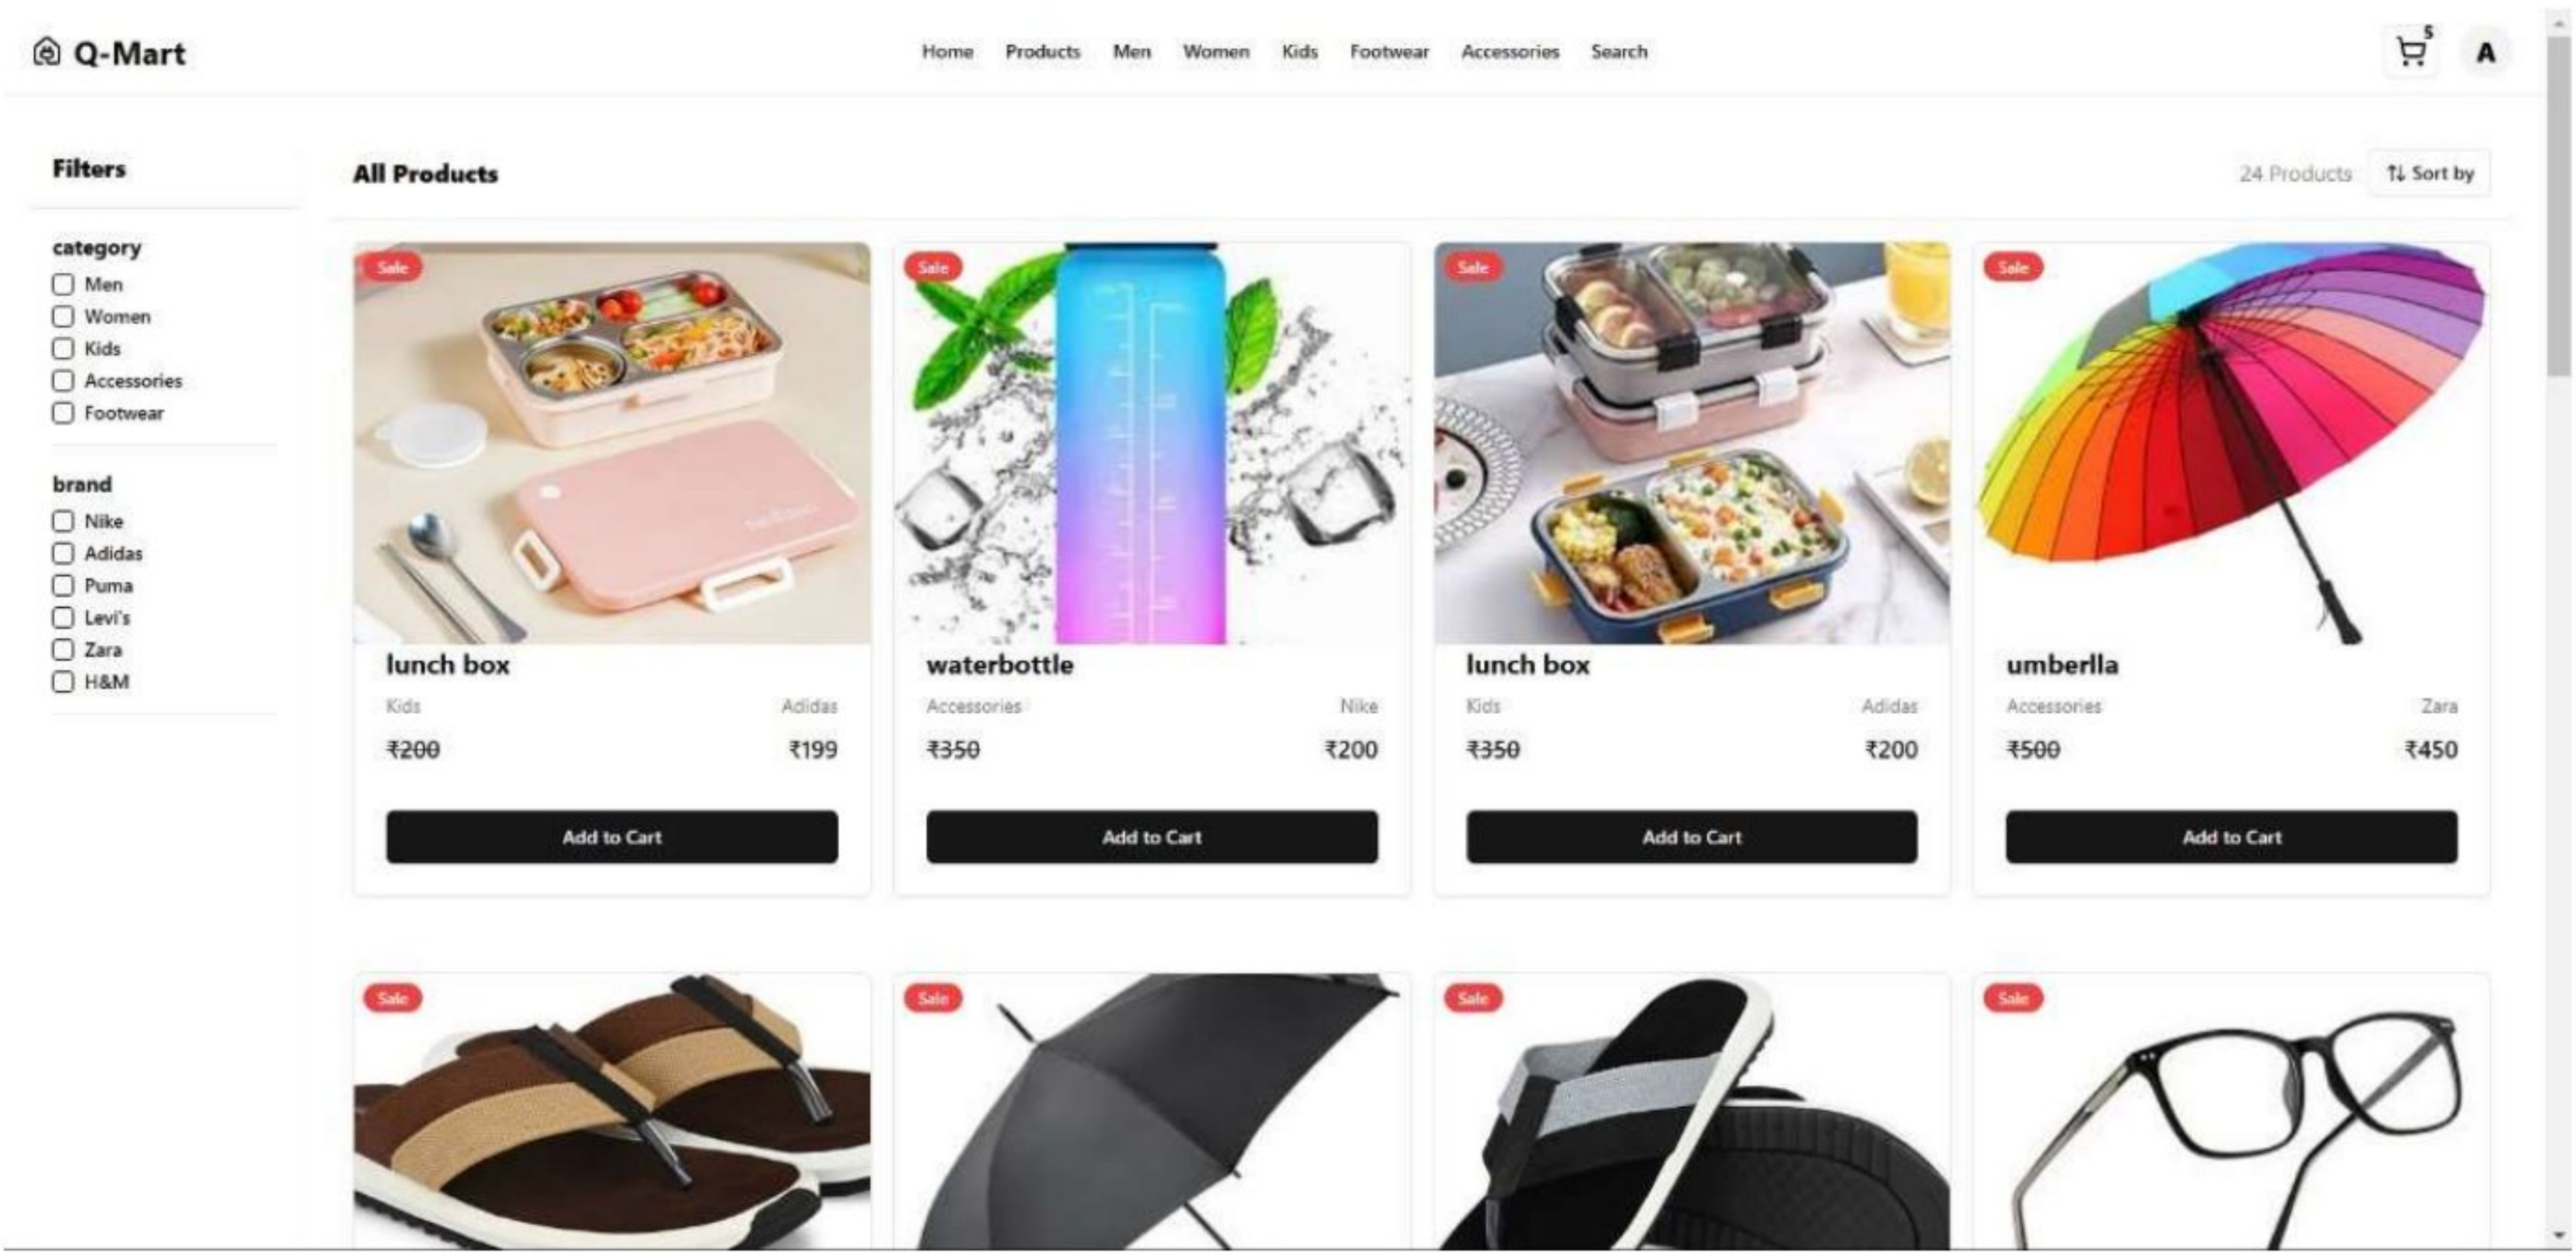

Here is an interface of our system.

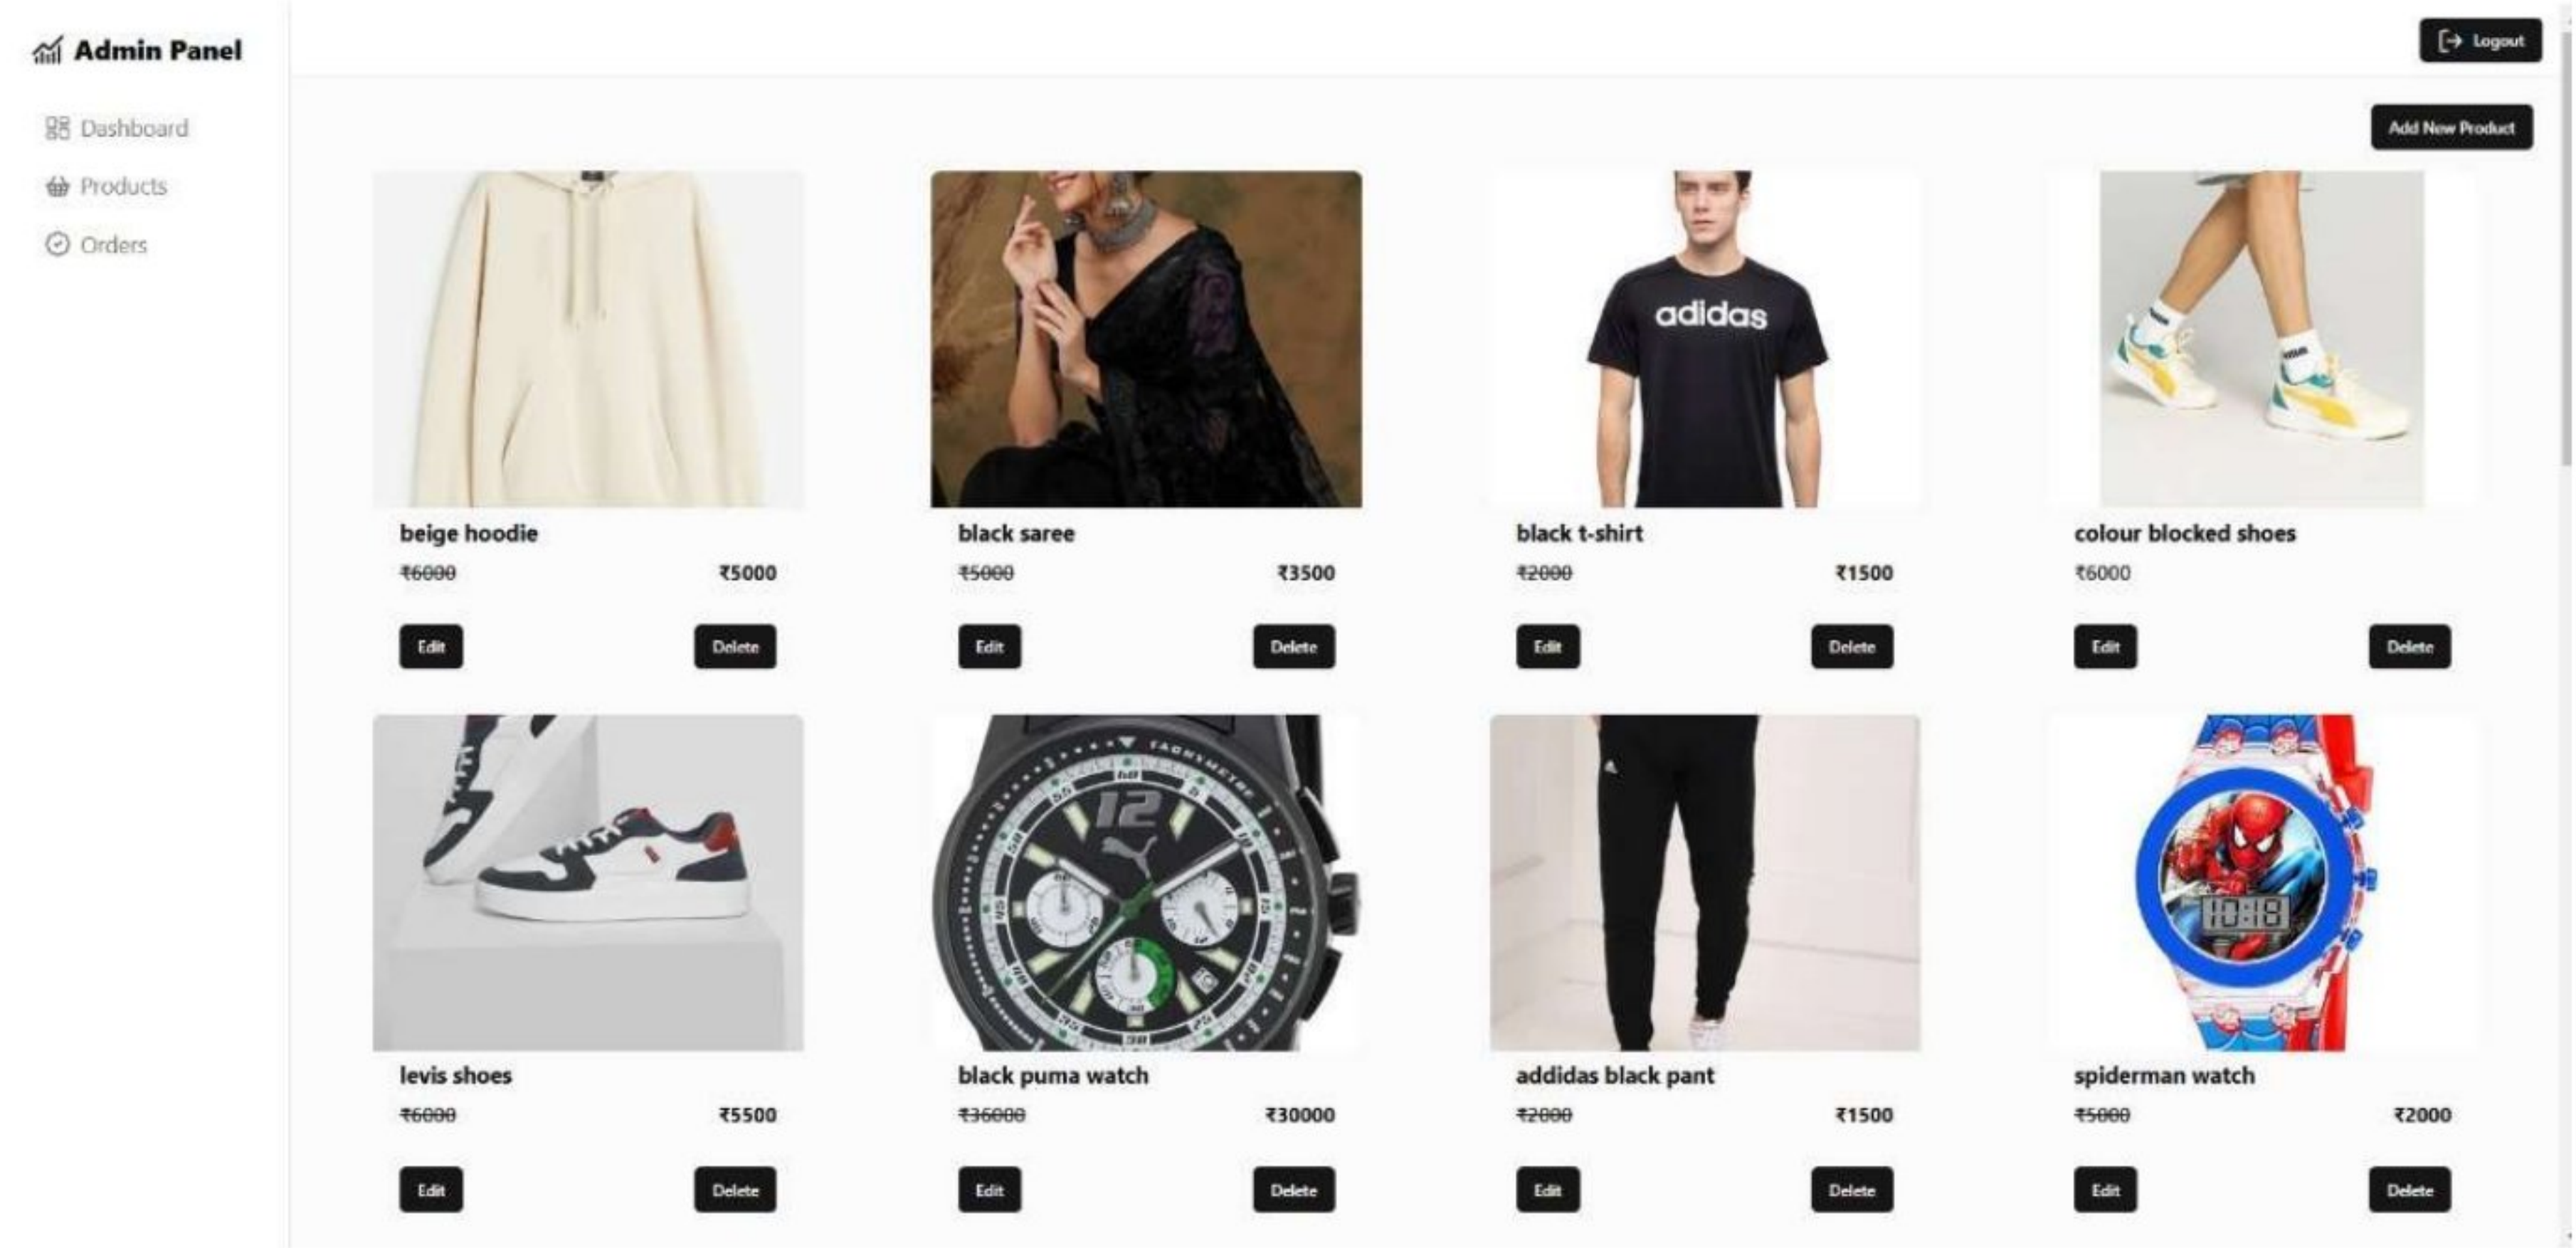

The platform has a simple search feature that helps users find what they’re looking for quickly. They can also use filters to narrow down their choices by price, brand, or rating.

When users find a product they like, they can view detailed descriptions and pictures to help them decide. The shopping cart feature lets them add items they want to buy, change the quantities, or remove items before checking out.

The checkout process is secure and straightforward. Users can log in or create an account and choose from different payment methods to complete their purchase. Once an order is placed, users receive confirmation of their purchase, making it easy to keep track of what they bought.
